

Waiting on the World to Change -- John Mayer

From *Continuum* (2006). About 88 BPM, est.

Bass: Harley Benton P/J, 5-string, passive. GP-5 only.

A deep, muted soul pocket. As far as I know, Pino Palladino played on much of *Continuum*, and his signature is a short, thumpy, flatwound-style note behind the beat.

Your P/J has roundwounds, so the patch and your hands fake the flatwound thump: heavy palm-muting near the bridge, tone rolled back.

Fingers, palm-muted. P pickup soloed. Tone knob around 25%.

AMP: Classic Bass (Ampeg SVT) + CAB: Apg115 IR (User IR 1)

A B-15 with a dark top is the classic soul thump. It's the studio amp behind decades of this sound.

Module chain

NR -- Gate, always on.

THRE: 10.

Low.

PRE -- COMP (Ross), always on.

Sustain: 38, VOL: 58.

Even, thumpy notes.

DST -- off. No grit.

AMP -- Classic Bass, always on.

Gain: 20, Bass: 60, Middle: 52, MidFreq: 220Hz, Treble: 28, VOL: 66.

Dark and thumpy. Treble 28 plus the rolled-back tone knob gives the flatwound impression.

CAB -- User IR 1 (Apg115), always on.

VOL: 60.

EQ -- Bass EQ 2, always on.

50Hz: 0, 120Hz: +3, 400Hz: +1, 800Hz: -1, 4.5kHz: -6, VOL: 52.

120Hz thump and 400Hz wood. -6 at 4.5kHz kills roundwound zing.

MOD -- off.

DLY -- off.

RVB -- Room, on CTL.

Mix: 10, Decay: 25, Trail: on.

A tiny room for the choruses.

CTL footswitch

On CTL: RVB (Room).

- **CTL off** -- Verses. A dead, deep, muted soul pocket. This is the resting state the patch loads into.
- **CTL on** -- Choruses. A small room so the thump blooms slightly.

Engage at the choruses. Mostly this patch just lives in CTL off.
