

Waiting on the World to Change (Rhythm Guitar) -- John Mayer

From *Continuum* (2006). About 88 BPM, est.

A Curtis Mayfield-style soul groove: clean, warm Strat double-stops and chord fragments with a relaxed feel, and a vocal-like lead.

Mayer's Continuum-era clean is usually described as Dumble or Two-Rock territory. There's no Dumble model on the GP-5, so this patch gets close with a warm, mid-rich clean.

Instrument: Stratocaster (HSS). Position 4 (neck+middle) for the double-stops. Neck pickup for the lead.

GP-5 only, Stratocaster (HSS), no pedalboard.

AMP: Match CL + CAB: EVM112 IR (User IR 5)

The Matchless clean has the thick, touch-sensitive, mid-rich clean that's the nearest GP-5 cousin to a Dumble or Two-Rock. The Twin is too scooped for this.

EVM112 is the loaded guitar cab with a flat, hi-fi response. It keeps Nashville clean tones honest and doesn't add V30 honk.

Module chain

NR -- Gate, always on.

THRE: 14.

Light.

PRE -- COMP (Ross), always on.

Sustain: 30, VOL: 55.

Light compression gives the soul double-stops an even, glassy pop.

DST -- Green OD (TS-808), on CTL.

Gain: 28, Tone: 50, VOL: 66.

A TS for the lead, which is Mayer's go-to. Gain 28 keeps it vocal and touch-sensitive rather than saturated.

AMP -- Match CL, always on.

Gain: 34, PRES: 48, VOL: 62, Bass: 50, Middle: 58, Treble: 52.

Gain 34 is a thick, warm clean that just blooms. Middle 58 for the Dumble-ish mid richness.

CAB -- User IR 5 (EVM112), always on.

VOL: 60.

EQ -- Guitar EQ 2, always on.

100Hz: -2, 500Hz: +1, 1kHz: +1, 3kHz: 0, 6kHz: -2, VOL: 50.

+1 at 500Hz and 1kHz for warmth and body. The top is trimmed.

MOD -- off. No modulation. The soul clean stays straight.

DLY -- Analog, on CTL.

Mix: 14, Time: 340ms, F.Back: 18, Trail: on.

A short, subtle tail for the lead.

RVB -- Room, always on.

Mix: 14, Decay: 30, Trail: on.

A small room.

CTL footswitch

On CTL: DST (Green OD), DLY (Analog).

- **CTL off** -- Rhythm. Warm, glassy soul double-stops and chord fragments. This is the resting state the patch loads into.

- **CTL on** -- Lead. A light TS push plus a subtle analog tail for the vocal-like lead lines and the solo.

Engage CTL for the solo and the melodic fills. Off for the groove.
