Spidey and His Amazing Friends Theme -- Patrick Stump

Revised 2026-10-16 following the approved library audit.
Type: Song. Instrument: Harley Benton passive 5-string P/J.
Full board. Board Option: American Sound (bypassed; retained for legacy full-board builds).
Patch screen name: B-SpideyFr. Patch VOL: 55.
Preset tempo: 150 BPM.

Bass: Harley Benton P/J, 5-string, passive. Full board.
The opening theme to Disney Junior's *Spidey and His Amazing Friends* (2021). Written, produced and sung by Patrick Stump of Fall Out Boy.
I haven't verified who played bass on the track, or how it was recorded.
The sound is pop-punk / power-pop: picked, driving eighths with a bright, gritty edge, like Fall Out Boy scaled for a kids' show.
Tempo: about 150 BPM, my estimate. Not measured.
Use a pick. Both pickups full, tone at about 70%. Picked attack is what makes pop-punk bass read in a busy mix.
One GP-5 sound for the whole song, so no CTL. That's allowed on bass per the patch rules.
The lift for the big hooks comes from the Tidal Wave drive footswitch on the board.

Revision intent

Keep the musical role of the original patch while reducing redundant gain, excessive space and unclear switching where identified in audit entry 104.
The module settings and section map below are the active revision.
Audited capture volumes and Michael's explicit patch-level adjustments are preserved.
No hardware audition or measured level match has been performed.

GP-5 settings

Module order: NR -> PRE -> DST -> AMP -> CAB -> EQ -> MOD -> DLY -> RVB.
The encoded N->S block sits between DST and AMP when a SnapTone is used.

AMP/CAB replacement: SnapTone BrightSVT (slot 55): SVT SANS BRIGHT DRIVE (SVT-CL) + Hartke410 (User IR 6).
Slot: 55. Always on.
Gain: 45, VOL: 60, Bass: 56, Middle: 52, Treble: 55.
AMP and CAB are both off; the capture already includes its cab/DI character.
The capture voice is fixed across CTL states. Audited VOL is preserved for this slot.

NR - Gate

THRE: 18.
Fixed on. Not on CTL.
Use the lowest threshold that keeps rests quiet. Check soft notes and held-note decay. This gate is before the drives and amp; it does not directly gate noise generated after it.

PRE - Module off

Not used.

DST - Module off

Not used.

AMP - Module off

Not used.

CAB - Module off

Not used.

EQ - Bass EQ 2

50Hz: 0.
120Hz: 2.
400Hz: -2.
800Hz: 1.
4.5kHz: 2.
VOL: 50.
Fixed on. Not on CTL.
Shapes note body and cut after the amp/capture. Where assigned to CTL, its output adds the specified lift after the gain stages. Numbers are GP-5 control values, not a calibrated loudness guarantee.

MOD - Module off

Not used.

DLY - Module off

Not used.

RVB - Room

Mix: 5.
Decay: 18.
Trail: on.
Fixed on. Not on CTL.
Adds the specified room or ambient tail. The revised mix keeps the initial note audible. Trail behavior follows the saved setting.

Switching and section map

CTL blocks: None.

- CTL off / loaded state: Verse groove. GP-5 active: NR, EQ, RVB, N->S.
- No GP-5 CTL change. Use the board stomps listed below when the arrangement needs another sound.
