I'm Diggin' You (Like an Old Soul Record) (Guitar) -- Meshell Ndegeocello

Revised 2026-10-16 following the approved library audit.
Type: Song. Instrument: HSS Stratocaster.
Full board. Board Option: American Sound (bypassed; retained for legacy full-board builds).
Patch screen name: G-DigginYo. Patch VOL: 50.
Preset tempo: 92 BPM.

From *Plantation Lullabies* (1993), Meshell Ndegeocello's debut. Co-produced by David Gamson, André Betts and Bob Power.
Wah Wah Watson is credited among the album's guitarists. I haven't confirmed he plays on this track.
The track is a laid-back early-90s neo-soul groove, built around Meshell's bass. Guitar's job is support: clean, warm, funky comping, with soul fills on top.
Tempo: about 92 BPM, my estimate. Not measured. Retime the delay by ear if it's off.
Instrument: Stratocaster (HSS).

- Rhythm: position 4 (neck+middle). Light, muted scratch chords and double-stops.
- Fills: neck pickup, or the bridge humbucker if you want more quack out of the envelope filter.

Revision intent

Keep the musical role of the original patch while reducing redundant gain, excessive space and unclear switching where identified in audit entry 153.
The module settings and section map below are the active revision.
Audited capture volumes and Michael's explicit patch-level adjustments are preserved.
CTL remains an intentional filtered-lead effect voice; do not add MIDI to a non-MIDI song build.
No hardware audition or measured level match has been performed.

GP-5 settings

Module order: NR -> PRE -> DST -> AMP -> CAB -> EQ -> MOD -> DLY -> RVB.
The encoded N->S block sits between DST and AMP when a SnapTone is used.

AMP/CAB replacement: SnapTone TwinClean (slot 61): CLEANEST - Fender Deluxe Reverb 1965 [Hyper Accuracy] + TWIN REVERB __ CLEAN (vulturized Twin).
Slot: 61. Always on.
Gain: 50, VOL: 75, Bass: 50, Middle: 54, Treble: 52.
AMP and CAB are both off; the capture already includes its cab/DI character.
The capture voice is fixed across CTL states. Audited VOL is preserved for this slot.

NR - Gate

THRE: 20.
Fixed on. Not on CTL.
Use the lowest threshold that keeps rests quiet. Check soft notes and held-note decay. This gate is before the drives and amp; it does not directly gate noise generated after it.

PRE - Toucher

Sense: 55.
Range: 50.
Q: 55.
Mix: 40.
Mode: 0.
CTL assigned. Loads off; first CTL press switches it on.
Controls the source dynamics or adds the specified push/filter before distortion and amp processing. The settings stay fixed; only its on/off state can change.

DST - Green OD

Gain: 20.
Tone: 55.
VOL: 60.
CTL assigned. Loads off; first CTL press switches it on.
Supplies the selected additional drive voice. Use its level and gain as separate controls. A pre-amp boost may add compression instead of a proportional solo-volume increase.

AMP - Module off

Not used.

CAB - Module off

Not used.

EQ - Guitar EQ 2

100Hz: -2.
500Hz: 0.
1kHz: 1.
3kHz: 1.

6kHz: -1.
VOL: 50.
Fixed on. Not on CTL.
Shapes note body and cut after the amp/capture. Where assigned to CTL, its output adds the specified lift after the gain stages. Numbers are GP-5 control values, not a calibrated loudness guarantee.

MOD - Module off

Not used.

DLY - Analog

Mix: 15.
Time: 326.
Feedback: 18.
Trail: on.
CTL assigned. Loads off; first CTL press switches it on.
Adds repeats only in the listed states. Trail preserves the remaining repeats when this block is bypassed; it does not change delay time or mix.

RVB - Spring

Mix: 10.
Decay: 30.
Trail: on.
Fixed on. Not on CTL.
Adds the specified room or ambient tail. The revised mix keeps the initial note audible. Trail behavior follows the saved setting.

Switching and section map

CTL blocks: PRE, DST, DLY.

- CTL off / loaded state: Clean soul comping. GP-5 active: NR, EQ, RVB, N->S.
- First CTL press: Filtered lead color. GP-5 active: NR, PRE, DST, EQ, DLY, RVB, N->S.
- Press CTL again to return to the loaded block pattern, provided no shared MIDI block has been changed.
