

Under the Bridge -- Red Hot Chili Peppers

Bass: Harley Benton P/J, 5-string, passive. Full board.

From *Blood Sugar Sex Magik* (1991), ~85 BPM.

Flea's part here is famously the opposite of his usual percussive slap style -- warm, restrained, melodic, almost guitar-like. Verses stay quiet and intimate, following the chords under Anthony Kiedis's vocal. Then the outro opens into one of the most cathartic moments in the band's catalog, the choir-backed "under the bridge downtown" swell.

CTL off = the quiet, restrained verse. CTL on = the huge choir-backed outro swell.

GP-5 settings

Module order: NR -> PRE -> DST -> AMP -> CAB -> EQ -> MOD -> DLY -> RVB.

NR -- Gate

- THRE: 12
- Always on. Very low threshold -- this tone is clean and quiet from top to bottom, nothing to clean up.

PRE -- Micro Boost -- On CTL

- Gain: 50
- CTL off: bypassed (verse). CTL on: engaged (outro).
- Verse stays soft and understated. Outro gets a clean push to help the bass swell along with the choir and full band.

DST -- Off

- No drive anywhere. This is a clean, emotional tone top to bottom -- the opposite of a typical Flea part.

AMP/CAB -- NAM SnapTone, slot 53: CleanSVT (always on)

- Built from the `SVT CLEAN (SVT-CL)` NAM and the Apg810 IR, combined into one snaptone.
- Real Ampeg SVT-CL preamp on its clean setting, into the Apg810 8x10 IR.
- Flea's part is clean and melodic, with the dynamics coming from his hands. Clean SVT gives it room.
- Gain: 48, VOL: 65, Bass: 58, Middle: 52, Treble: 48
- Gain 48: a little under default. This part wants less push than the other CleanSVT patches.
- Bass 58: more low end.
- Middle 52: a touch more midrange.
- Treble 48: top end pulled back a little.
- VOL 65: the level Michael set for this snaptone in the 2026-10-02 VOL audit. Trim here if the patch jumps in level against your others.
- Same in both CTL states. AMP and CAB are off in the `.prst`, so nothing stacks on the capture. The N->S block calls slot 53 directly.

EQ -- Bass EQ 2

- 50Hz: +3, 120Hz: +1, 400Hz: 0, 800Hz: +1, 4.5kHz: +2, VOL: 55

- Always on, same for both CTL states.
- A gentle, mostly-flat curve -- this tone doesn't need aggressive shaping. +3 at 50Hz keeps real low-end weight, +2 at 4.5kHz adds just enough presence to keep the melodic line clear without brightening it past "warm."

MOD -- Off

- No modulation. This part is plain and direct on the record -- texture would work against its sincerity.

DLY -- Off

- Not used.

RVB -- Hall -- On CTL

- Mix: 32, Decay: 50, Trail: On
- CTL off: bypassed (verse -- dry and intimate). CTL on: engaged (outro).
- Hall, and pushed further than usual (Mix 32, Decay 50) -- this outro is genuinely massive and cathartic, one of the biggest emotional swells in the band's catalog, and it needs a reverb big enough to actually open the space up for that.

CTL summary

- **CTL Off -- Verse.** Quiet, warm, restrained. Sits back and follows the chords.
- **CTL On -- Outro.** Boost and a big Hall reverb engage together, opening the tone up to match the choir-backed climax.
- Engage CTL right as the "under the bridge downtown" outro begins, and leave it on through to the end.

Full pedalboard (signal chain order)

1. Flamma FS-08 Octave -- Bypassed

- Footswitch off. This melodic line needs a single clean fundamental -- no reason to layer octaves on such a restrained, intimate part.

2. Donner Ultimate Comp -- Engaged

- COMP: 42
- TONE: 50
- LEVEL: 55
- Mode: NORMAL
- Light-to-moderate compression keeps the melodic phrasing smooth without squashing the natural dynamics of the performance. NORMAL mode over TREBLE -- this tone wants warmth, not extra brightness.

3. Donner Stylish Fuzz -- Bypassed

- Footswitch off. No fuzz anywhere near this patch.

4. Joyo Tidal Wave -- Engaged

- Drive: 10
- Blend: 20

- Presence: 50
- Level: 55
- Treble: 50
- Middle: 55
- Bass: 58
- Mid-Frequency: 500Hz
- Bass-Shift: 40Hz
- Cab-Sim (DI out): On
- Ground Lift: On
- Used purely as a clean-leaning tone shaper and DI stage, not an overdrive -- Drive stays low and Blend stays mostly clean. Bass-Shift at 40Hz keeps the low end full and warm rather than tight, matching this song's unhurried, emotional feel.

5. Joyo Narcissus -- Bypassed

- Footswitch off. No chorus -- matches the MOD-off call on the GP-5. Plain, direct, warm tone throughout.

6. Valeton GP-5 -- see settings above.
