

My Maria -- Brooks & Dunn

From *Borderline* (1996). About 96 BPM, est.

Bass: Harley Benton P/J, 5-string, passive. GP-5 only.

A loping mid-tempo groove under the falsetto hook. The bass is round and locked to the kick, with some movement into the chorus.

Built from the song's overall sound. I haven't verified the session bassist's exact rig.

Fingers. P forward, a little J blended in for definition. Tone knob around 55%.

AMP: Classic Bass (Ampeg SVT) + CAB: Apg810 IR (User IR 3)

An SVT into an 8x10 gives a full, punchy low end with enough mids to sit under a rock-leaning country band.

Apg810 is the direct real-world pairing for Classic Bass.

Module chain

NR -- Gate, always on.

THRE: 12.

Low. Just catches hum.

PRE -- COMP (Ross), always on.

Sustain: 40, VOL: 58.

Evens out the groove so every note of the pattern sits at the same level.

DST -- Bass OD, on CTL.

Gain: 20, Blend: 25, VOL: 55, Bass: 50, Treble: 50.

Barely-there hair for the choruses. Blend 25 keeps it mostly clean.

AMP -- Classic Bass, always on.

Gain: 25, Bass: 56, Middle: 54, MidFreq: 450Hz, Treble: 48, VOL: 65.

Clean SVT. Middle 54 at 450Hz gives note body.

CAB -- User IR 3 (Apg810), always on.

VOL: 60.

EQ -- Bass EQ 2, always on.

50Hz: 0, 120Hz: +2, 400Hz: -1, 800Hz: +2, 4.5kHz: -2, VOL: 52.

Punch at 120Hz, a small mud cut at 400Hz, and 800Hz for finger attack.

MOD -- off.

DLY -- off.

RVB -- off. Dry and tight.

CTL footswitch

On CTL: DST (Bass OD).

- **CTL off** -- Verses. Clean, round, locked groove. This is the resting state the patch loads into.
- **CTL on** -- Choruses. A light Bass OD adds grit so the bass pushes with the fuller band.

Engage at the choruses. Step off for the verses.
