

# Hard Workin' Man (Rhythm Guitar) -- Brooks & Dunn

Title track of \*Hard Workin' Man\* (1993). About 150 BPM, est.

A fast, raucous honky-tonk rocker: chunky, twangy rhythm, chicken-pickin' fills, and a hot Tele-style solo.

Built from the song's overall sound. I haven't verified the exact guitars and amps on the record.

Instrument: Stratocaster (HSS). Position 2 (bridge+middle) for twang. Bridge humbucker for the solo.

GP-5 only, Stratocaster (HSS), no pedalboard.

## AMP: Tweedy (Tweed Deluxe) + CAB: EVM112 IR (User IR 5)

A tweed Deluxe is ragged and raucous even at low gain. That's the grit a fast honky-tonk rocker wants under the twang.

EVM112 is the loaded guitar cab with a flat, hi-fi response. It keeps Nashville clean tones honest and doesn't add V30 honk.

## Module chain

**NR -- Gate**, always on.

THRE: 22.

Keeps the stops tight. Fast honky-tonk has a lot of hard stops.

**PRE -- COMP4 (Keeley C4)**, always on.

Sustain: 50, Attack: 45, Clip: 40, VOL: 58.

Chicken-pickin' needs compression: every plucked note snaps out at the same level. Attack 45 lets the pick click through.

**DST -- Super OD (SD-1)**, on CTL.

Gain: 38, Tone: 58, VOL: 68.

The SD-1 for the solo. It has a tight, bright bite that suits fast Tele-style runs. VOL 68 adds about +3dB.

**AMP -- Tweedy**, always on.

Gain: 36, Tone: 60, VOL: 62.

Gain 36 is just broken up. Tone 60 gives twang without ice.

**CAB -- User IR 5 (EVM112)**, always on.

VOL: 60.

**EQ -- Guitar EQ 2**, always on.

100Hz: -3, 500Hz: -1, 1kHz: +1, 3kHz: +2, 6kHz: -1, VOL: 50.

Tight lows for fast chucking. The 3kHz lift adds snap.

**MOD -- off.**

**DLY -- Slapback**, always on.

Mix: 18, Time: 95ms, F.Back: 6, Trail: on.

A single 95ms slap. The classic country thickener. It doesn't depend on tempo.

**RVB -- Spring**, always on.

Mix: 12, Decay: 30, Trail: on.

A dash of spring. Most of the space comes from the slap.

## **CTL footswitch**

On CTL: DST (Super OD).

- **CTL off** -- Rhythm. Compressed, gritty tweed twang with slapback for the chucking rhythm and fills. This is the resting state the patch loads into.

- **CTL on** -- Lead. The SD-1 pushes the tweed into a hot, biting solo tone.

Engage CTL for the solos. Stay off for the rhythm and the chicken-pickin' fills.
