

Homegrown-ZBB -- Homegrown by Zac Brown Band

Jekyll + Hyde, 2015. ~100 BPM, est.

Bright, punchy country-rock groove -- no drive, no clutter, just a clean tight pocket that drives the song.

GP-5 only, P/J bass, no pedalboard.

IR: Hartke410

Hartke XL410, aluminum cones -- bright and aggressive. Loaded on User IR slot 6, paired with the GP-5's Classic Bass (Ampeg SVT) AMP model.

The aluminum-cone brightness is the whole point here -- this needs to cut clean through acoustic/electric guitars and banjo without any grit.

- AMP Gain: 55 -- clean headroom, no breakup.
- Bass: 55 -- enough low end for the groove without getting boomy.
- Middle: 60 -- present midrange so the line doesn't disappear under the guitars.
- MidFreq: 800Hz -- sits in the same pocket as pick attack, keeps the note readable.
- Treble: 65 -- bright on purpose, matches the Hartke cab's character.
- AMP VOL: 72. CAB VOL: 65.

Module chain

NR -- Gate, always on.

THRE: 30. Standard noise floor cleanup, nothing aggressive.

PRE -- Micro Boost, on CTL.

Gain: 35 when engaged.

Off for the verse groove, on for the chorus -- same clean tone, just pushed harder into the front end for the lift.

DST -- off.

No drive anywhere in this patch. Country-rock brightness comes from the cab and EQ, not grit.

AMP -- Classic Bass, always on. See settings above.

CAB -- User IR 6 (Hartke410), always on. VOL: 65.

EQ -- Bass EQ 1, always on.

33Hz: +2, 150Hz: +1, 600Hz: -2, 2kHz: +4, 8kHz: +3, VOL: 55.

A light scoop around 600Hz keeps things from getting boxy, and the 2kHz/8kHz lift adds pick-attack clarity and air -- this is a bright, present tone, not a dark one.

MOD -- off. Straightforward country groove, no modulation needed.

DLY -- off. Dry and direct.

RVB -- Room, on CTL.

Mix: 20, Decay: 35, Trail: true.

Off for the verse -- tight and dry. On for the chorus alongside the boost, giving the hook a touch more size without washing out the groove.

CTL footswitch

Two modules on CTL: PRE (Micro Boost) and RVB (Room).

- **CTL off** -- main verse groove. Dry, tight, driving. Resting state the patch loads into.
- **CTL on** -- chorus lift. Boosted front end plus a touch of room, brighter and bigger for the hook.

Engage CTL going into each chorus, back off for the verses.
