

Islands in the Stream -- Kenny Rogers

Eyes That See in the Dark, 1983. Duet with Dolly Parton. ~104 BPM, est.

Smooth, polished, radio-ready pop-country -- the bass job here is melodic support, not grit. Clean, present, sits under two vocalists without crowding either one.

GP-5 only, Sire fretless (Active), no pedalboard.

IR: EBS410

EBS ProLine 410, User IR 4. Accentuated high-mids with a characterful boost around 2-3kHz -- exactly the clarity this part needs to stay articulate on a fretless without getting boomy.

Paired with GP-5 AMP model **Classic Bass** (Ampeg SVT) -- no EBS-family amp model exists in the catalog, so this is picked by ear for a clean, present low end under the cab's hi-mid lift.

- AMP Gain: 35 -- clean headroom, just enough amp character to not sound DI-flat.
- Bass: 55, Middle: 60, MidFreq: 450Hz -- midrange pushed and centered low for warmth without mud.
- Treble: 55 -- bright enough to read clearly, not harsh.
- AMP VOL: 70
- CAB (User IR 4) VOL: 65

Module chain

NR -- Gate, always on.

THRE: 22. Light touch -- just enough to clean up fretless string noise between phrases.

PRE -- Micro Boost, on CTL.

Gain: 35 when engaged.

Off for the verse groove, on for the big duet chorus hook -- same clean tone throughout, just pushed harder up front for the "islands in the stream" line.

DST -- off. No drive anywhere. This tone stays clean start to finish.

AMP -- Classic Bass, always on. See above.

CAB -- User IR 4 (EBS410), always on. See above.

EQ -- Bass EQ 2, always on.

50Hz: +2, 120Hz: +1, 400Hz: -2, 800Hz: +1, 4.5kHz: +3, VOL: 55.

Small low-end reinforcement, a light scoop around 400Hz to keep things from getting boxy, and a lift at 4.5kHz for fretless finger-attack clarity in a busy mix.

MOD -- B-Chorus, always on, light hand.

Depth: 15, Rate: 0.6Hz, VOL: 55.

Very subtle shimmer under the tone -- polished 80s pop-country sheen, not a wet chorus effect. Sits underneath, never on top.

DLY -- off. No delay -- this is a straightforward melodic groove, not an atmospheric part.

RVB -- Room, on CTL.

Mix: 28, Decay: 40, Trail: true.

Off for the verse -- dry and present, right on the beat. On for the chorus, alongside the boost, for a touch more size on the hook.

CTL footswitch

Two modules on CTL: PRE (Micro Boost) and RVB (Room).

- **CTL off** -- verse groove. Dry, clean, melodic, present. Resting state the patch loads into.
- **CTL on** -- chorus hook. Boosted front end plus a touch of room reverb -- bigger and slightly more open for "Islands in the Stream," same clean tone underneath.

Engage CTL going into each big chorus hit, back off for the verses. Simple two-state song patch.
