

Lucille-KR -- Lucille by Kenny Rogers

Kenny Rogers, 1977. Mid-tempo, ~100 BPM est.

A story-song, not a rocker -- Lucille walking out on her husband in a bar, told over a warm, unhurried country groove.

The bass job here is to sit under the story, not draw attention to itself.

GP-5 only, Sire fretless (Passive), no pedalboard.

IR: Apg115410

Summed Ampeg Heritage B-15 + HLF 410 blend -- flat response, thunderous low end. Slot 2.

Paired with Classic Bass (Ampeg SVT) for AMP -- the B-15/SVT lineage is exactly the warm, unhyped low end this song wants.

Module chain

NR -- Gate, always on.

THRE: 30. Light gate, just enough to clean up noise on a passive fretless without choking the sustain of a held note.

PRE -- Micro Boost, on CTL.

Gain: 30 when engaged.

Off for the verses -- the story parts stay conversational and restrained.

On for the chorus/hook lines -- a small nudge forward, not a different tone.

DST -- off.

No drive anywhere. This is a clean, warm 70s country ballad.

AMP -- Classic Bass (Ampeg SVT), always on.

Gain: 35, Bass: 60, Middle: 55, MidFreq: 450Hz, Treble: 45, VOL: 65.

Moderate gain for headroom, bass and mid pushed for warmth and body, treble held back so the fretless stays round instead of zingy.

CAB -- User IR 2 (Apg115410), always on.

VOL: 60. The B-15+410 blend gives a flat, full low end without any hype -- exactly what a supportive story-song bass part needs.

EQ -- off. The AMP's own tone controls handle shaping; no need to stack another EQ stage.

MOD -- off. No chorus/vibe -- the fretless glide speaks for itself here, don't wash it out.

DLY -- off. Straight through, no delay.

RVB -- Room, on CTL.

Mix: 25, Decay: 30, Trail: false.

Off for the verses -- dry and close, right in the room with the story.

On for the chorus, alongside the boost -- a touch more air without turning it into a wash.

CTL footswitch

Two modules on CTL: PRE (Micro Boost) and RVB (Room).

- **CTL off** -- verse/narrative sound. Dry, warm, restrained. This is the resting state the patch loads into.
- **CTL on** -- chorus/hook sound. Small boost plus a touch of room reverb, same core tone, just a little more presence.

Engage CTL going into the "Lucille" hook lines, back off for the story verses. Light-handed split -- this song doesn't need a dramatic CTL contrast, just a gentle lift.
