

1979 -- The Smashing Pumpkins

Bass: Harley Benton P/J, 5-string, passive. GP-5 only.

From *Mellon Collie and the Infinite Sadness* (1995), ~126 BPM.

D'Arcy Wretzky's part here is simple and melodic, sitting inside a hazy, nostalgic, looped-and-textured production -- shimmering guitars, a programmed-feeling drum groove, everything a little washed and dreamy. The song holds a pretty consistent mood throughout, with a small lift into the "and I don't even care to shake these zipper blues" hook.

CTL off = the main hazy verse. CTL on = a gentle lift for the hook.

GP-5 settings

Module order: NR -> PRE -> DST -> AMP -> CAB -> EQ -> MOD -> DLY -> RVB.

NR -- Gate

- THRE: 12
- Always on. Very low threshold -- clean, dreamy tone throughout, nothing to clean up.

PRE -- Micro Boost -- On CTL

- Gain: 45
- CTL off: bypassed (verse). CTL on: engaged (hook).
- A gentle push for the hook, keeping the song's overall consistent, unhurried mood intact rather than a big dynamic swing.

DST -- Off

- No drive. This tone stays clean and hazy from top to bottom.

AMP -- Mess Bass (Mesa/Boogie Bass 400+)

- Gain: 35, VOL: 65, Bass: 56, Middle: 50, Treble: 58
- Always on, same for both CTL states.
- A hi-fi, headroom-first voicing gives this the clarity to sit inside a dense, textured mix without getting swallowed. Treble pushed a bit for presence against all the shimmering guitar layers.

CAB -- User IR 4 (EBS410)

- VOL: 58
- Always on, same for both CTL states.
- Accentuated high-mids that sit well in a mix, particularly on clean tones -- exactly what this part needs to stay present against a wash of guitars and synths without adding its own aggressive character.

EQ -- Bass EQ 2

- 50Hz: +3, 120Hz: +1, 400Hz: -1, 800Hz: +1, 4.5kHz: +3, VOL: 55
- Always on, same for both CTL states.
- +3 at 4.5kHz adds a touch of shimmer to match the song's dreamy top end, while +3 at 50Hz keeps real low-end weight underneath all that haze.

MOD -- B-Chorus (Boss CEB-3)

- Depth: 35, Rate: 0.5Hz, VOL: 56
- Always on, same for both CTL states.
- Pushed a bit past the usual light-touch default -- this song's whole atmosphere is built on shimmering, slightly phased textures, so a more present chorus is a deliberate call, not an oversight.

DLY -- Analog

- Mix: 15, Time: 380ms, Feedback: 15, Trail: On
- Always on, same for both CTL states.
- Kept low in the mix -- this isn't a rhythmic delay, it's there to add a touch of the same spacious, echo-laden quality the guitars have, without cluttering the bass's own rhythmic role. Trail on so the tail doesn't cut off if the patch changes mid-note.

RVB -- Room -- On CTL

- Mix: 22, Decay: 35, Trail: On
- CTL off: bypassed (verse). CTL on: engaged (hook).
- A touch more openness for the hook, layering on top of the always-on chorus and delay for a slightly bigger moment without breaking the song's hazy, consistent mood.

CAB IR -- EBS410 (Slot 4)

- EBS ProLine 410 with a 2" tweeter, confirmed loaded on User IR slot 4. Accentuated high-mids that sit well in a mix, particularly on clean tones.
- Encoded directly into the `.prst` as a real, active CAB reference (`User IR 4`) -- no manual loading needed for this one.

CTL summary

- **CTL Off -- Verse.** Hazy, dreamy, consistent -- the song's default mood throughout.
- **CTL On -- Hook.** A gentle boost and a touch more room lift the "shake these zipper blues" hook just slightly above the rest.
- Engage CTL for the hook line, back off returning to the main verse feel.

Note on GP-5-only

This patch is GP-5 only -- no pedalboard beyond the Valeton GP-5 itself. All the tone (haze, shimmer, space) comes from the GP-5's own modules above.
