

Ain't Nothing 'Bout You -- Brooks & Dunn

Bass: Harley Benton P/J, 5-string, passive. Full board.

From *Steers & Stripes* (2001), ~128 BPM.

A fast, danceable, driving neo-traditional country hit -- twangy Telecaster and steel guitar up front, a two-step energy that stays high throughout. The bass job is to stay clean, punchy, and present, driving the groove without ever getting distorted or aggressive -- country bass leans on note definition and drive, not grit. Energy stays fairly consistent song-wide, with a small lift at the chorus.

CTL off = the driving verse. CTL on = the chorus lift.

GP-5 settings

Module order: NR -> PRE -> DST -> AMP -> CAB -> EQ -> MOD -> DLY -> RVB.

NR -- Gate

- THRE: 14
- Always on. Low-moderate threshold -- clean, driving country tone, minimal grit.

PRE -- Micro Boost -- On CTL

- Gain: 48
- CTL off: bypassed (verse). CTL on: engaged (chorus).
- Verse already drives hard on its own. Chorus gets a clean push to lift energy slightly.

DST -- Off

- No drive. Country bass stays clean -- the twang and drive come from the guitars and steel, not the low end.

AMP -- Foxy Bass (Vox AC-100)

- VOL: 68, Bass: 58, Treble: 56
- Always on, same for both CTL states.
- A simple, direct bass voicing rather than a modern high-headroom design -- fits the straightforward, unfussy character of country bass tone well.

CAB -- User IR 6 (Hartke410)

- VOL: 60
- Always on, same for both CTL states.
- Bright, aggressive aluminum-cone voicing -- keeps this cutting through a fast, driving mix of twangy guitars and steel without adding its own grit.

EQ -- Bass EQ 1

- 33Hz: +2, 150Hz: -1, 600Hz: +2, 2kHz: +4, 8kHz: +3, VOL: 55
- Always on, same for both CTL states.
- +4 at 2kHz and +3 at 8kHz keep this bright and present, matching the driving, danceable energy of the song. -1 at 150Hz keeps it from getting muddy at this tempo.

MOD -- Off

- No modulation. Straightforward, driving country-rock tone.

DLY -- Off

- Not used.

RVB -- Room -- On CTL

- Mix: 16, Decay: 26, Trail: On
- CTL off: bypassed (verse -- tight and dry). CTL on: engaged (chorus).
- A light touch of room for the chorus, kept subtle to match this genre's generally dry, direct production.

CAB IR -- Hartke410 (Slot 6)

- Hartke XL410 with aluminum cones, confirmed loaded on User IR slot 6. Bright, aggressive voicing suited to a driven, present bass tone.
- Encoded directly into the `.prst` as a real, active CAB reference (`User IR 6`) -- no manual loading needed for this one.

CTL summary

- **CTL Off -- Verse.** Driving, clean, punchy country groove.
- **CTL On -- Chorus.** Boost and room reverb engage together for a slight lift.
- Engage CTL right as the chorus hits, back off returning to the verse.

Full pedalboard (signal chain order)

1. Flamma FS-08 Octave -- Bypassed

- Footswitch off. No octave layering needed for this driving country groove.

2. Donner Ultimate Comp -- Engaged

- COMP: 48
- TONE: 58
- LEVEL: 58
- Mode: TREBLE
- Keeps the fast, driving groove even and consistent. TREBLE mode keeps pick/finger attack bright, matching the clean, present character this whole tone is built around.

3. Donner Stylish Fuzz -- Bypassed

- Footswitch off. No fuzz anywhere -- country bass stays clean.

4. Joyo Tidal Wave -- Engaged

- Drive: 15
- Blend: 30
- Presence: 58

- Level: 58
- Treble: 56
- Middle: 55
- Bass: 55
- Mid-Frequency: 1000Hz
- Bass-Shift: 80Hz
- Cab-Sim (DI out): Off
- Ground Lift: Off
- Adds presence and attack. Mid-Frequency at 1000Hz and Bass-Shift at 80Hz both push toward articulation over body, matching this song's fast, danceable, driving energy.

5. Joyo Narcissus -- Bypassed

- Footswitch off. No chorus -- matches the MOD-off call on the GP-5. Clean, direct country tone throughout.

6. Valeton GP-5 -- see settings above.
