

You Don't Know How It Feels (Rhythm Guitar) -- Tom Petty

From *Wildflowers* (1994), produced by Rick Rubin. About 92 BPM, est.

A laid-back, dry, head-nodding groove with harmonica and a relaxed strum. Rubin's production keeps everything natural and uncluttered.

Built from the song's overall sound. I haven't verified the exact guitars and amps on the record.

Instrument: Stratocaster (HSS). Position 4 (neck+middle) for the strum. Bridge humbucker for the lead lines.

GP-5 only, Stratocaster (HSS), no pedalboard.

Module chain

NR -- Gate, always on.

THRE: 16.

Light.

PRE -- off. No compressor. The strum should breathe naturally, Rubin-style.

DST -- Green OD (TS-808), on CTL.

Gain: 30, Tone: 52, VOL: 68.

A mild push for the lead lines and the solo. It's warm, not hot.

AMP/CAB -- NAM SnapTone, slot 70: GlassyAC30 (always on)

- Built from the `SLAMMIN\_VOX\_AC30\_N\_V3\_TC0\_S` NAM and the Origin Effects British Alnico 2x12 Medium Mix IR, combined into one snaptone.
- Real AC30 Normal channel at volume 3, glassy and clean, into the British Alnico 2x12.
- Petty's jangly clean: glassy AC30 Normal channel.
- Gain: 49, VOL: 50, Bass: 50, Middle: 50, Treble: 50
- Gain 49: a little under default. This part wants less push than the other GlassyAC30 patches.
- Bass 50: flat.
- Middle 50: flat.
- Treble 50: flat.
- VOL 50: the default. Trim here if the patch jumps in level against your others.
- Same in both CTL states. AMP and CAB are off in the `.prst`, so nothing stacks on the capture. The N->S block calls slot 70 directly.

EQ -- Guitar EQ 2, always on.

100Hz: -2, 500Hz: 0, 1kHz: +1, 3kHz: 0, 6kHz: -2, VOL: 50.

Warm and uncluttered. The top is trimmed.

MOD -- off.

DLY -- Analog, on CTL.

Mix: 12, Time: 320ms, F.Back: 15, Trail: on.

A barely-there tail behind the lead. Mix 12.

RVB -- Room, always on.

Mix: 10, Decay: 25, Trail: on.

A small, dry room. This record is intimate.

CTL footswitch

On CTL: DST (Green OD), DLY (Analog).

- **CTL off** -- Rhythm. A warm, dry AC30 strum for the verses and choruses. This is the resting state the patch loads into.

- **CTL on** -- Lead. Mild Green OD plus a short analog tail for the lead lines and the solo.

Engage CTL for the solo and the melodic lines. Off for strumming.
