

River Down Below -- Riverside

Riverside. BPM est. Epic, dynamic, slow-building. The bass has to be deep and full when the song swells, and gritty when it hits. Built from the band's general sound; exact rig on the recording not verified.
GP-5 only, P/J bass, no pedalboard.

AMP: Mess Bass + CAB: Apg115410 IR (User IR 2)

Apg115410 (B-15 plus HLF 410 summed) -- flat, thunderous. Gives the low end room for the swells.

Module chain

NR -- Gate, always on.

THRE: 18.

Moderate gain. 18 is enough for the rests.

PRE -- COMP, always on.

Sustain: 48, VOL: 58.

Steady level for a long dynamic song.

DST -- Bass OD, on CTL.

Gain: 35, Blend: 45, VOL: 60, Bass: 52, Treble: 48.

Grit for the payoff sections.

AMP -- Mess Bass, always on.

Gain: 35, VOL: 62, Bass: 60, Middle: 55, Treble: 45.

Mesa Bass 400. Gain 35 is edge-of-grit. Bass 60 for depth.

CAB -- User IR 2 (Apg115410), always on.

VOL: 60.

Apg115410 IR.

EQ -- Bass EQ 1, always on.

33Hz: +2, 150Hz: +2, 600Hz: -1, 2kHz: +2, 8kHz: 0, VOL: 50.

Bass EQ 1 reaches lower. Sub lift at 33Hz, mid dip at 600Hz, some 2kHz for note definition.

MOD -- off. No modulation.

DLY -- off. No delay.

RVB -- Hall, on CTL.

Mix: 18, Decay: 40, Trail: off.

Sized for the swells. Mix 18 stays out of the way of the low end.

CTL footswitch

On CTL: DST (Bass OD), RVB (Hall).

- **CTL off** -- Verses and build-up. Mess Bass at moderate gain, full low end, dry. This is the resting state the patch loads into.
- **CTL on** -- Big sections. Bass OD adds grit and a hall reverb adds size.

Engage CTL for the swells and heavy payoffs. Back off for the quiet build.
