

Storm Corrosion -- Storm Corrosion

Storm Corrosion, the Steven Wilson and Mikael Akerfeldt project. BPM est., slow. Dark, sparse, folk-tinged ambient. The bass is warm and deep, working as a low anchor, not a lead voice. Built from the project's general sound; exact bass rig and who played it not verified.

GP-5 only, P/J bass, no pedalboard.

AMP: Classic Bass + CAB: Apg115410 IR (User IR 2)

Apg115410 -- flat, thunderous, deep. Anchors a sparse arrangement.

Module chain

NR -- Gate, always on.

THRE: 8.

Very quiet tone. 8 barely touches it.

PRE -- COMP, always on.

Sustain: 35, VOL: 58.

Very light. Preserves dynamics.

DST -- Bass OD, on CTL.

Gain: 20, Blend: 30, VOL: 60, Bass: 50, Treble: 35.

Light push for the climax. Dark treble, Blend 30.

AMP -- Classic Bass, always on.

Gain: 15, Bass: 62, Middle: 45, MidFreq: 220Hz, Treble: 30, VOL: 64.

Very clean SVT. Gain 15, Treble 30, MidFreq 220Hz for a woolly low-mid.

CAB -- User IR 2 (Apg115410), always on.

VOL: 60.

Apg115410 IR.

EQ -- Bass EQ 2, always on.

50Hz: +3, 120Hz: +3, 400Hz: +1, 800Hz: -3, 4.5kHz: -5, VOL: 50.

Dark. Low end up, top rolled off.

MOD -- off. No modulation.

DLY -- off. No delay.

RVB -- Deepsea, on CTL.

Mix: 25, Decay: 55, Trail: off.

Huge deep decay for the climax. Mix 25 is obvious on purpose here.

CTL footswitch

On CTL: DST (Bass OD), RVB (Deepsea).

- **CTL off** -- Main body. Dark, deep, clean, dry. This is the resting state the patch loads into.
- **CTL on** -- Climactic sections. Light drive and a large Deepsea reverb.

Engage CTL for the climax moments. Back off for the sparse parts.
