

# We Got Used to Us -- Riverside

Riverside. BPM est. Moody, restrained, atmospheric. The bass is warm and round with a bit of width, sitting under the melody instead of pushing. Built from the band's general sound; exact rig on the recording not verified. GP-5 only, P/J bass, no pedalboard.

## AMP: Classic Bass + CAB: Apg115 IR (User IR 1)

Apg115 (Ampeg B-15 1x15) -- 100Hz peak adds girth, dark and round. Suits a subdued, moody part.

## Module chain

**NR -- Gate**, always on.

THRE: 12.

Low gain and low noise. 12 just tidies the rests.

**PRE -- COMP**, always on.

Sustain: 42, VOL: 58.

Gentle leveling. 42 keeps dynamics for a moody part.

**DST -- Bass OD**, on CTL.

Gain: 25, Blend: 32, VOL: 60, Bass: 50, Treble: 42.

Light push for the build. Blend 32 adds weight, not aggression.

**AMP -- Classic Bass**, always on.

Gain: 24, Bass: 60, Middle: 48, MidFreq: 450Hz, Treble: 38, VOL: 64.

SVT with the B-15 style cab is the round, warm voice this song wants. Gain 24 is clean. MidFreq 450Hz keeps mids smooth. Treble 38 is dark on purpose.

**CAB -- User IR 1 (Apg115)**, always on.

VOL: 60.

Apg115 IR.

**EQ -- Bass EQ 2**, always on.

50Hz: +3, 120Hz: +2, 400Hz: +1, 800Hz: -2, 4.5kHz: -3, VOL: 50.

Warm low end, rolled-off top. Keeps the bass under the vocal.

**MOD -- B-Chorus**, always on.

Depth: 12, Rate: 0.5, VOL: 50.

Light hand. Depth 12 and a slow 0.5Hz rate add width you feel more than hear.

**DLY -- off**. No delay. Reverb handles space.

**RVB -- Plate**, on CTL.

Mix: 14, Decay: 30, Damp: 50, Trail: off.

Small plate for the build. Mix 14 keeps the low end clear.

## **CTL footswitch**

On CTL: DST (Bass OD), RVB (Plate).

- **CTL off** -- Verses and quiet passages. Warm SVT tone with a faint chorus, dry. This is the resting state the patch loads into.
- **CTL on** -- Bigger sections. Light Bass OD adds weight and a small plate reverb opens the space.

Engage CTL when the band builds. Back off for verses and quiet breaks.
