

Heads Carolina, Tails California (Rhythm Guitar) -- Jo Dee Messina

Jo Dee Messina, 90s country-pop. About 118 BPM, est. Bright, bouncy country-rock rhythm guitar: a crisp, slightly crunchy strum with a little twang, sitting on the groove. Built from the genre's general sound; the exact guitar and amp on the record are not verified.

Instrument: Stratocaster (HSS). Use the bridge or bridge-and-middle position for the twang.

GP-5 only, Stratocaster (HSS), no pedalboard.

AMP: Bellman 59B + CAB: EVM112 IR (User IR 5)

EVM112 (Electro-Voice EVM12L) -- open and full-range, the best loaded guitar-friendly cab for a bright clean-crunch sound. The Origin Effects Tweed Combo or American Twin IRs would also fit but are not loaded.

Module chain

NR -- Gate, always on.

THRE: 15.

Bright, edge-of-breakup tone. 15 quiets single-coil noise between strums.

PRE -- COMP, always on.

Sustain: 40, VOL: 55.

Country-style compression. 40 evens out the strums and adds snap.

DST -- Green OD, on CTL.

Gain: 30, Tone: 60, VOL: 62.

On CTL. Pushes the amp for a bigger chorus strum. Tone 60 keeps the twang.

AMP -- Bellman 59B, always on.

Gain: 35, PRES: 55, VOL: 62, Bass: 45, Middle: 55, Treble: 58.

Fender Bassman bright channel. Classic country-rock crunch with a lot of snap. Gain 35 is edge of breakup.

Treble 58 keeps the twang.

CAB -- User IR 5 (EVM112), always on.

VOL: 60.

EVM112 IR.

EQ -- Guitar EQ 1, always on.

125Hz: -1, 400Hz: -1, 800Hz: 0, 1.6kHz: +2, 4kHz: +2, VOL: +50.

Slight low cut for a tight strum. +2 at 1.6kHz and 4kHz adds the twang and pick snap.

MOD -- off. No modulation. The strum stays direct.

DLY -- Slapback, always on.

Mix: 12, Time: 110, F.Back: 8, Trail: off.

Always on. A short slap gives that country strum some depth. Mix 12 and F.Back 8 keep it to a single quiet echo.

RVB -- Spring, always on.

Mix: 15, Decay: 25, Trail: off.

Always on. Spring reverb is the classic country pairing. Short decay keeps the strum tight.

CTL footswitch

On CTL: DST (Green OD).

- **CTL off** -- Verse rhythm. Crisp, clean-crunch strum with a light slapback and spring reverb. This is the resting state the patch loads into.
- **CTL on** -- Chorus rhythm. Green OD pushes the amp for a bigger, fatter strum.

Engage CTL for the chorus. Back off for the verse.
